

Brantz Universal Wheel Sensor

BR2A

Oct 2010

Right Track Enterprises Ltd

www.brantz.co.uk

June 2004 saw the last of the Brantz BR2 14mm type wheel sensors (14mm diameter). The introduction of the BR2A type wheel sensor sees a shift in the performance available. The new BR2A is a 12mm device with slightly different performance characteristics and is designed for the 2005 range of Brantz tripmeters which are recognisable by the integral side mounting plates (International 1, 2, and 2S types) or serial numbering 04-07-etc. The new sensor may well work with older tripmeters but this cannot be relied upon. Old tripmeters can be upgraded at the Brantz factory for a small charge, or free of charge if the meters have come in for a service.
